AF

Laura Kirkebæk-Johansson

Efter mange års kamp kan arbejdet med at oprense kemikaliedepotet ved Høfde 42 endelig gå i gang.

Det siger Bent Graversen (V), der er formand for udvalget for regional udvikling i Region Midtjylland.

- Vi har fået de 378 millioner kroner, vi manglede for at kunne indgå kontrakten med Arkil, (der skal stå for oprensningen, red.), siger han til Ritzau.

Pengene er blevet tildelt i forbindelse med, at regeringen mandag har indgået aftale om deludmøntning af Grøn Fond.

Bent Graversen vurderer, at oprensningen kan være færdigt i slutningen af 2029.

Kemikalierne endte ved Høfde 42 i 1950'erne og 1960'erne, fordi virksomheden Cheminova havde statens tilladelse til at grave kemiaffald ned på stedet.

BLOOMSBURY

## **We need a paradigm shift: Regenerative business**

In our opinion, they must take a regenerative approach to business. This idea involves a strategy that promotes the restoration and regeneration of natural resources and social systems. It goes beyond sustainability and seeks to create positive impacts on the environment, society and economy.

World Economic Forum

### **Q: What is ecological economics?**

... It's an attempt to look at humans embedded in their ecological life-support system, not separate from the environment. It also has some design elements, in the sense of how do we design a sustainable future.? It's not just analysis of the past but applies that analysis to create something new and better.

WWF

### **What is a 'Wellbeing Economy'?**

A 'wellbeing economy' starts from the idea that public interests should determine economics and not the other way around. Rather than pursuing economic growth through narrowly defined indicators such as GDP, a wellbeing economy monitors and values what truly matters: our health, nature, education, and communities.
