AddiFab

.....

Etableret 2014

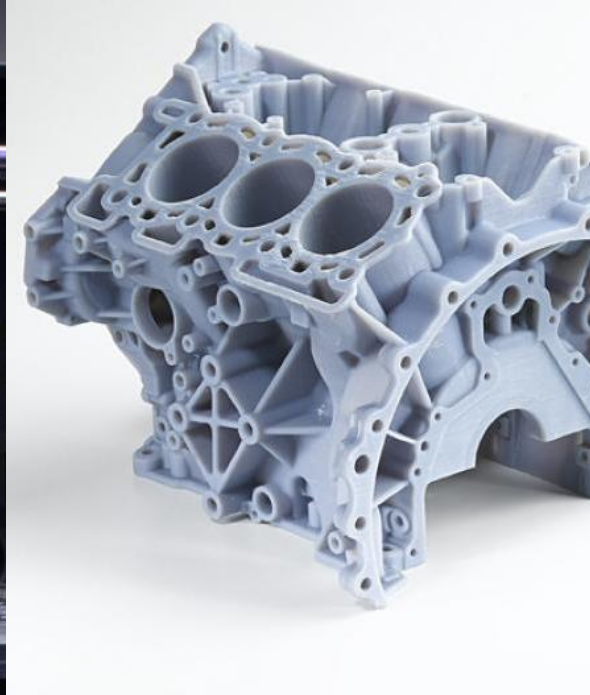

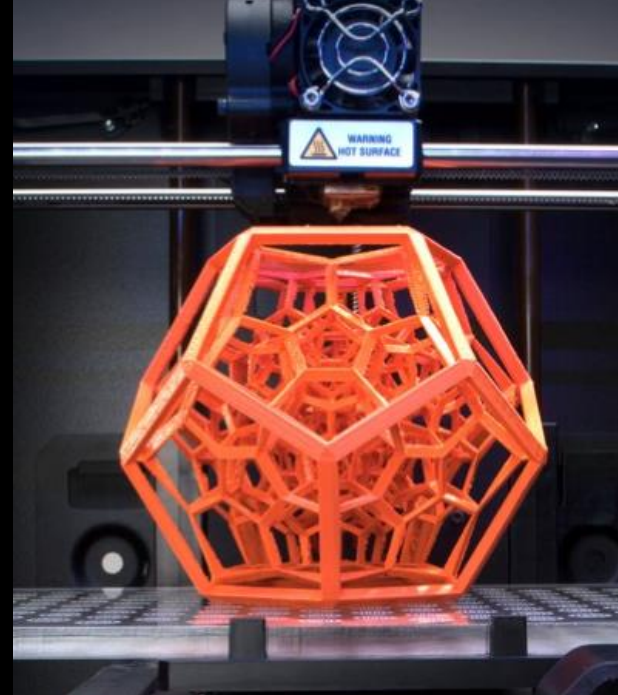

~20 ansatte

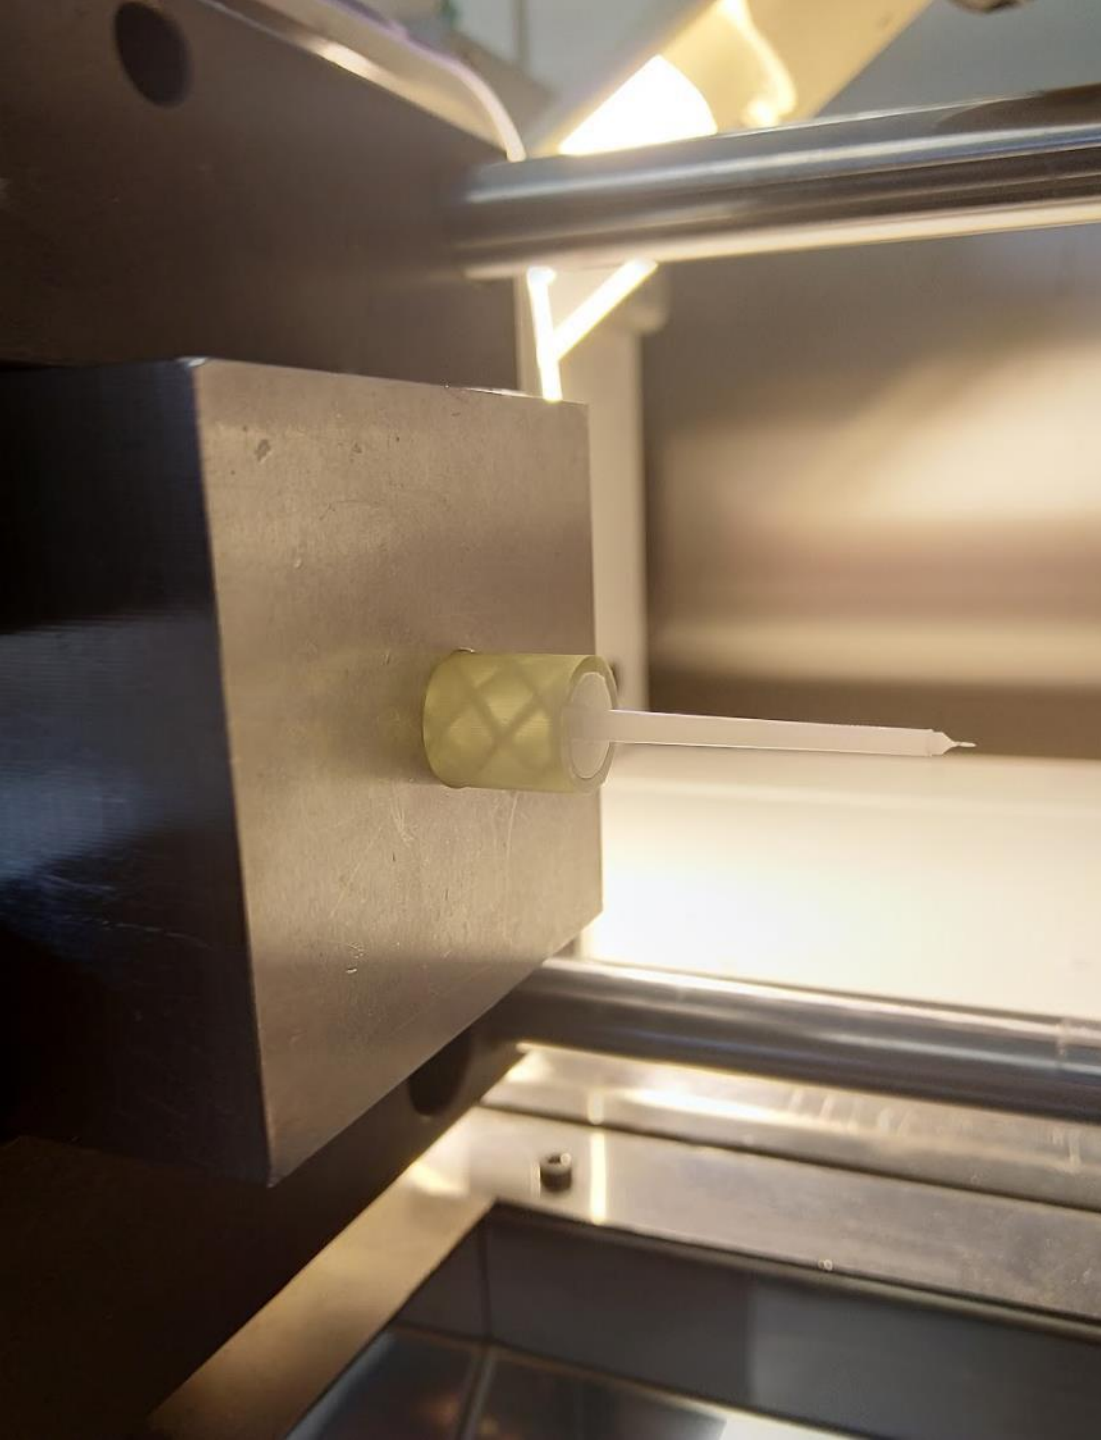

Fokus på Industrialiseret 3D-print – og proces-integration

Hvorfor AddiFab?

3D-Prints potentiale kan ikke udnyttes...

Et fundamentalt problem

.....

En Støbeform koster hurtigt 100.000 kr.

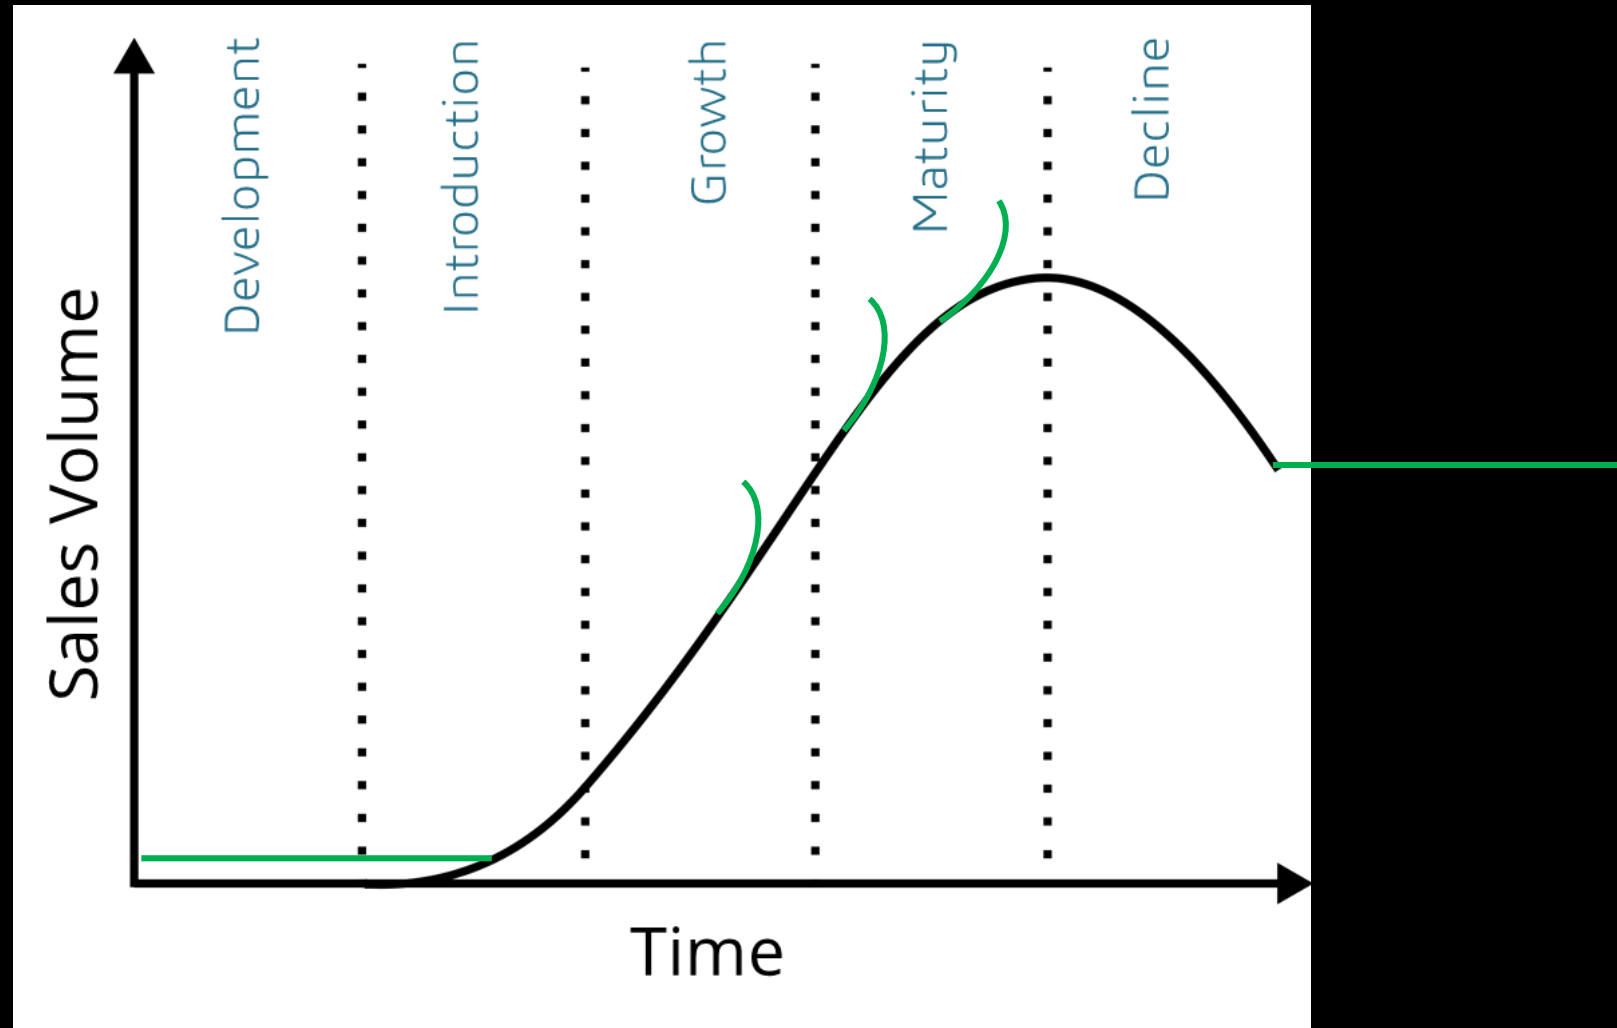

Et 3D-printet emne koster måske 100 kr.

Det er ikke muligt at bevæge sig direkte fra 3D-print til sprøjttestøbning

Og dermed stilles producenter overfor valget mellem fleksibilitet og skalerbarhed.

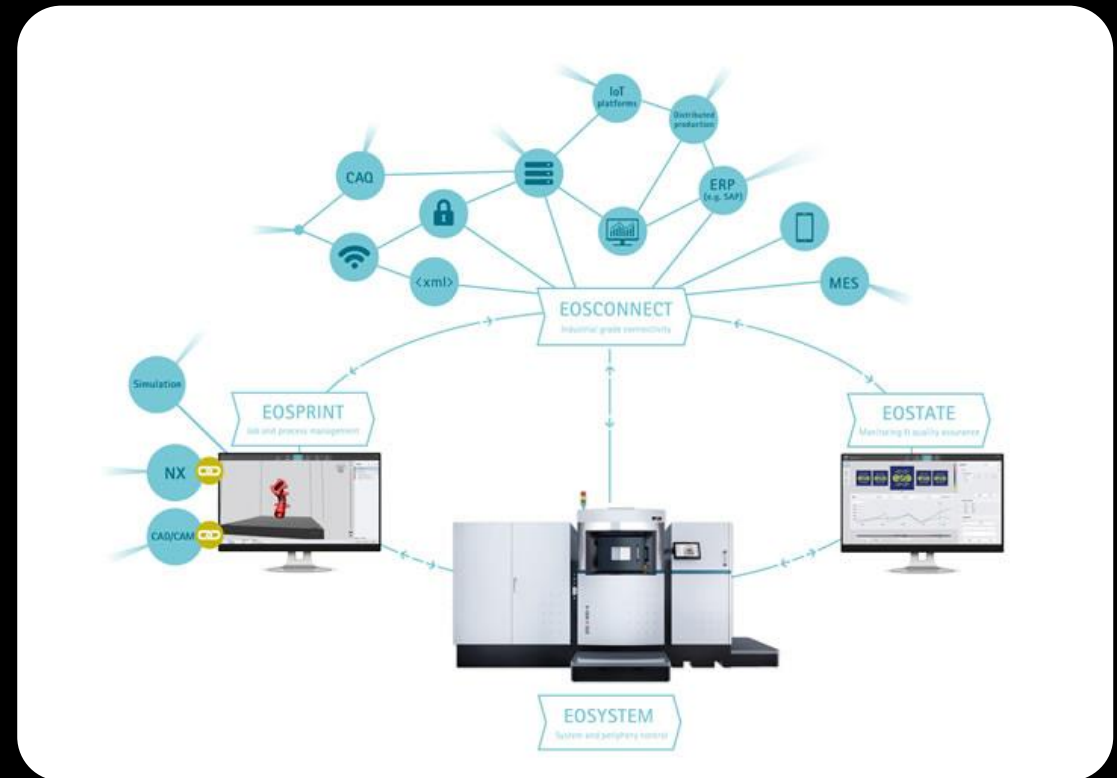

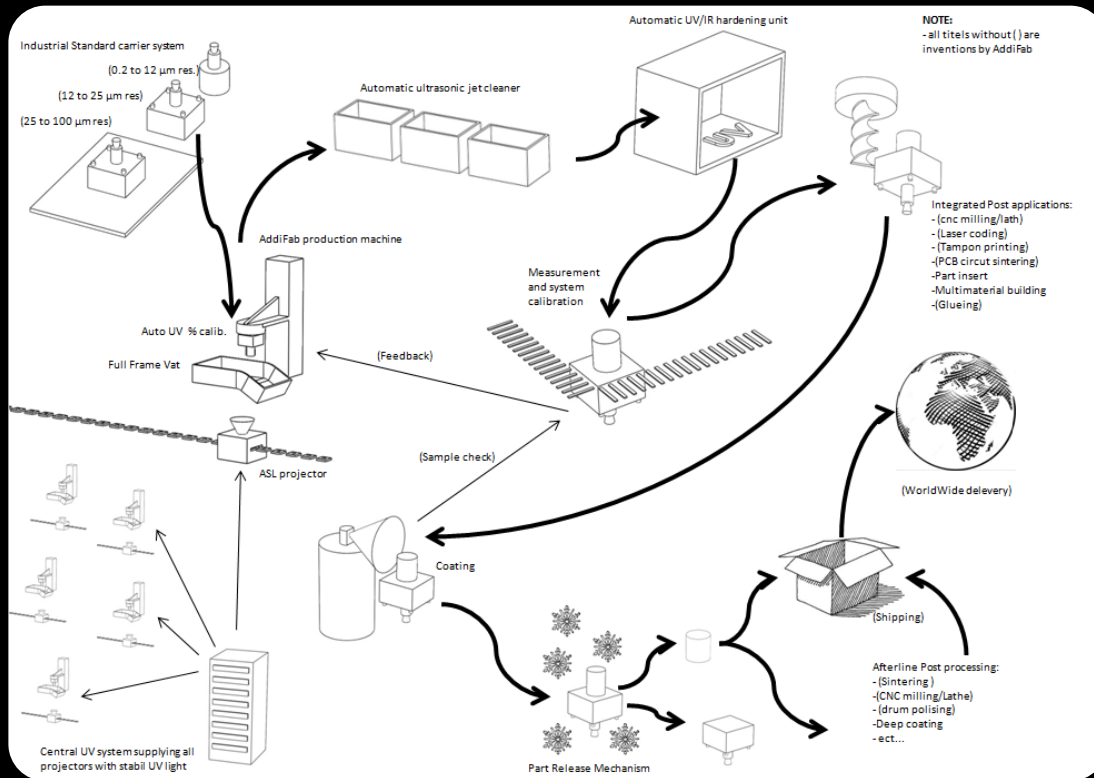

Og hvad betyder det så i praksis?

.....

Øko-systemer vs. Ego-systemer
